Subject: Video footage from Greece - 2025

Dear Hans,

Cc Lars

On the new operational plan and the hope to get video footage from Greece in 2026, let me remind you of our attempts in this regard for 2025.

In 2025, in two cases we did not receive anything useful from the Greek authorities:

technical equipment x2

- **SIR 10180/2025:** the SIR team received information that a co-financed vessel (██████████) was involved in an incident on 10/01/2025 near Rhodes. We initiated the established procedure to obtain access to the video recording(s). What we received, however, was an 8-second video showing almost total darkness.
- **reporting tools** ██████████: another co-financed vessel ██████████ deployed to ██████████ was involved in an **operational area** incident on 25.06.2025. Once again, we initiated the same procedure in due time, but in this case ██████████ **human resources** ██████████ replied that the Implementation Plan had concluded, and therefore the agreement on granting access to video recordings would need to be renegotiated with the Agency.

We will keep trying in 2026 but are not hopeful, on the contrary.

Best,

Joans
